

“Original Finish”™ Stainless Steel Cleaner

Stainless Steel: The look, the feel, the finish

Avesta OriginalFinish™

Stainless steel is popular because of its polished look, clean feel and durable finish. It is the surface of choice in buildings and homes because of its natural ability to form a layer of chromium oxide, which protects the surface. Because this layer is compromised by fingerprints, grease and surface rust, regular cleaning with OriginalFinish™ products is recommended to preserve the appearance and integrity of your stainless steel surface.

OriginalFinish™ is the only stainless steel cleaner on the market that is made by a stainless steel manufacturer. It was developed at the request of our customers, because they could not find a cleaning product that could maintain the original luster of their original stainless steel products. Our name says it all: OriginalFinish™ helps you preserve the original look, the original feel, the original finish of your stainless steel.

We make steel - We finish it

NSF Reg. No. 136045, 136046, 136047
Category Codes A1, A3, A7

OriginalFinish™ products are tested and certified by NSF International, The Public Health and Safety Company™.
